

TORKK BRAND WEBSITE

Complete Website Structure + Developer Handoff

Brand: Torkk

Company: BlackOriginX Private Limited

Domain: www.torkk.in

Website Type: Informational / Brand Website

1. Website Structure

2. Header Structure

Desktop

- Left: Torkk Logo
- Center: Home, About, Safety, Services, Contact
- Right: Get in Touch

Mobile

TORKK LOGO

Clicking the hamburger opens: Home, About, Safety, Services, Contact, and Get in Touch.

Header should remain sticky.

3. Home Page Structure

HOME

- Hero
- What is Torkk?
- The Problem
- Our Idea
- Safety
- Mobility Services
- How We Think About Mobility
- Vision
- Future Vision
- About BlackOriginX
- Contact CTA

3.1 Hero

THE FUTURE OF
EVERYDAY MOBILITY.

[Mobility Visual]

Torkk is building a technology-driven
mobility platform designed to make
everyday transportation simpler,
safer and more accessible.

[Explore Torkk] [Get in Touch]

Hero should be visually strong. Use urban mobility imagery, Torkk branding, car/bike/auto visual language, and an app/device mockup only if it supports the brand story. Do not make it look like a booking screen.

4. What is Torkk?

WHAT IS TORKK?

[Large Brand Statement]

Short explanation of Torkk and its mobility concept.

[Mobility Illustration]

Purpose: The visitor should immediately understand what Torkk is.

5. The Problem

Section headline: "Mobility Should Be Simpler."

THE PROBLEM

Keep this section visual and avoid excessive paragraphs.

6. Our Idea

OUR IDEA

Explain the basic Torkk concept.

Core brand pillars: Technology + Mobility + Safety + Accessibility

7. Safety Section

This should be one of the most visually prominent sections. Only show safety capabilities that are actually implemented and approved. Focus on the safety philosophy rather than an exhaustive technical feature list.

8. Services Section

Headline: ONE MOBILITY PLATFORM. MULTIPLE WAYS TO MOVE.

Each card should contain only an icon/image, service name, and a 1–2 line description. No pricing, subscriptions, offers, fare information, or booking buttons.

9. How We Think About Mobility

OUR APPROACH

10. Vision Section

Use large typography and a minimal design.

11. Future Vision

WHERE WE'RE GOING

Communicate long-term direction using wording such as "We're building toward..." rather than presenting future plans as already launched products.

12. About BlackOriginX

BUILT BY BLACKORIGINX

Torkk is a mobility brand developed by BlackOriginX Private Limited.

[BlackOriginX Logo]

[Learn More]

Keep this section relatively small.

13. Contact CTA

LET'S BUILD THE FUTURE OF MOBILITY.

Have a question, idea or partnership opportunity?

[Get in Touch]

14. About Page

URL: /about

- ABOUT
- Hero
 - About Torkk
 - Why We Exist
 - Our Philosophy
 - Our Vision
 - Our Mission

- └─ BlackOriginX
- └─ Contact CTA

15. Safety Page

URL: /safety

- SAFETY
 - └─ Hero
 - └─ Safety Philosophy
 - └─ Technology & Safety
 - └─ Responsible Mobility
 - └─ Safety-first Product Design
 - └─ Contact / Learn More CTA

This page should focus on Torkk's safety philosophy, not become a technical feature manual.

16. Services Page

URL: /services

- SERVICES
 - └─ Hero
 - └─ Mobility Overview
 - └─ Cab
 - └─ EV Mobility
 - └─ Auto
 - └─ Bike
 - └─ Parcel
 - └─ Future Mobility

Each service can have a dedicated visual section. Keep descriptions short and informational. No pricing or booking functionality.

17. Contact Page

URL: /contact

- CONTACT
 - └─ Hero
 - └─ Contact Information
 - └─ Contact Form
 - └─ Business / Partnership
 - └─ Careers
 - └─ Company Information

Form fields: Name, Email, Phone, Subject, Message. Include validation and a clear success/error state.

18. Footer Structure

TORKK Building safer, simpler and smarter mobility for everyday India.		
Company	Explore	Legal
About	Services	Privacy Policy
Vision	Safety	Terms & Conditions
Mission	Contact	
Instagram	LinkedIn	YouTube
© 2026 BlackOriginX Private Limited		

19. Design System

Brand direction: Dark Blue, Sky Blue, Light Pink, White, Dark/Charcoal. Use pink primarily as an accent.

- Large typography
- Spacious layouts
- Rounded cards
- Clean grid system
- Premium imagery
- Subtle gradients
- Minimal shadows
- Smooth transitions

20. Responsive Structure

Desktop: 12-column grid

Tablet: 8-column grid

Mobile: 4-column grid

All sections must stack naturally on mobile. No horizontal scrolling.

21. Component Structure

```
components/  
├── Navbar  
├── Footer  
├── Hero  
├── SectionHeader  
├── FeatureCard  
├── ServiceCard  
├── SafetySection  
├── VisionSection  
├── CTASection  
├── ContactForm  
└── SocialLinks
```

Use reusable components and avoid duplicated UI code.

22. Routing

```
/
/about
/vision
/safety
/services
/contact
/privacy-policy
/terms-and-conditions
```

23. Tech Stack

- Next.js 15
- React
- TypeScript
- Tailwind CSS
- Framer Motion

Backend is only required where needed, primarily for the contact form. Do not build unnecessary database/backend complexity for the first version.

24. File / Project Structure

```
torkk-website/
├── app/
│   ├── page.tsx
│   ├── about/page.tsx
│   ├── vision/page.tsx
│   ├── safety/page.tsx
│   ├── services/page.tsx
│   ├── contact/page.tsx
│   ├── privacy-policy/page.tsx
│   └── terms-and-conditions/page.tsx
├── components/
│   ├── Navbar.tsx
│   ├── Footer.tsx
│   ├── Hero.tsx
│   ├── ServiceCard.tsx
│   ├── SafetySection.tsx
│   ├── VisionSection.tsx
│   └── CTASection.tsx
├── public/
│   ├── images/
│   ├── icons/
│   └── logos/
```

```
|— lib/
|— styles/
|— README.md
```

25. Important

This is NOT an app website. The website should not try to reproduce the Torkk Customer App or Driver App.

Torkk Brand Website = explains the brand and idea.

Torkk App = handles the actual mobility experience.

The website should explain the brand, problem, concept, safety philosophy, services and vision.

26. Final User Journey

```
Visitor
↓
Hero
↓
What is Torkk?
↓
Problem
↓
Our Idea
↓
Safety
↓
Services
↓
Vision
↓
BlackOriginX
↓
Contact
```

At every stage, the visitor should understand more about what Torkk is building and why it exists.

27. Final Design Direction

The website should feel like a premium mobility-tech company website, not a ride-booking marketplace.

Overall experience: clean, modern, trustworthy, technology-led, safety-focused and brand-driven.
